

Ultrasky[®]
ROOF by Ultraframe

THE ULTIMATE **ORANGERY** DESIGN

Ultrasky roof combines fresh modern styling with natural light to create a **beautiful warm glazed extension** with the style and grandeur of a traditional orangerie.

THE ULTIMATE **ORANGERY** DESIGN

Ultrasky roof combines fresh modern styling with natural light to create a **beautiful warm glazed extension** with the style and grandeur of a traditional orangerie.

Engineered by Ultraframe, strength is the secret behind Ultrasky's success. A stronger, thermally efficient ridge means less bars are needed drawing more light into the room. The Ultrasky roof maximises light by extending to the eaves beam rather than using a flat roof and uses the internal pelmet and the external cornice to create a beautiful orangerie roof style.

performance

STRONGEST

Strongest
glazed roof on
the market

Light and style are perfectly embodied in the Ultrasky roof. Choose from four decorative cornices to hide the guttering, creating beautiful sightlines at the roofline. Vary the width of the internal pelmet to enjoy better lighting and thermal performance with a seamless, room-like feel or you can even opt for integrated speakers to enhance your experience.

Ultrasky Roof is perfect for both traditional and contemporary orangery and extension designs. Superb for spanning bi-fold or sliding doors, the super-strong slimline structural goalpost hidden inside Ultrasky works together with the roof to reduce deflection pressure on your doors. Ultrasky roof is available in any colour, in uPVC or Aluminium and with endless other design options for a truly bespoke design.

It is Ultraframe's policy to continually seek to improve its products, processes and service and we reserve the right to change specifications without prior notice. We have been trading for nearly 35 years and strive to deliver unrivalled quality and service.
